## Process Mining Performance and Bottleneck Analysis

Total Cases

31.51K

Avg Duration

21.90

Median Duration

19.09

P90 Duration

35.05

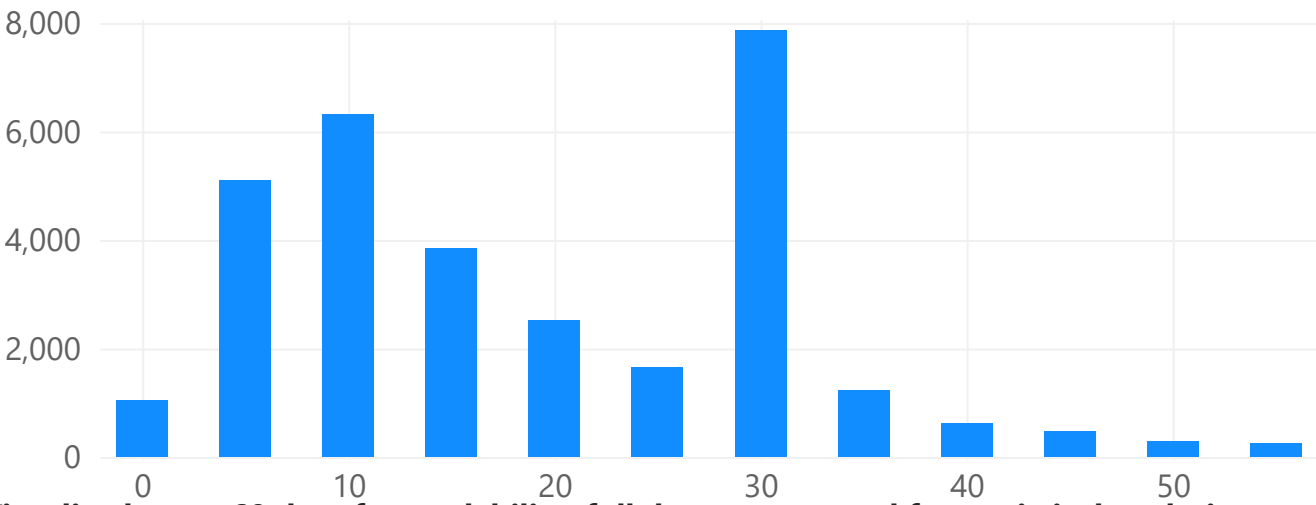

Variants

3.392K

Rework %

56.65%

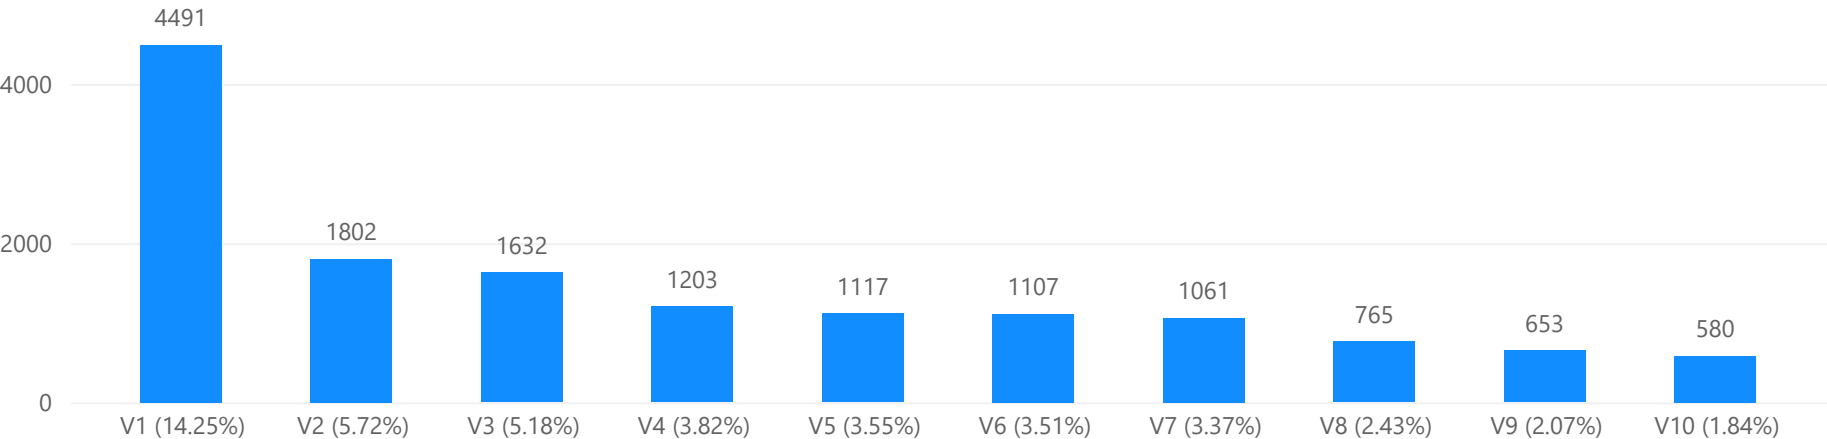

### Case Duration Distribution

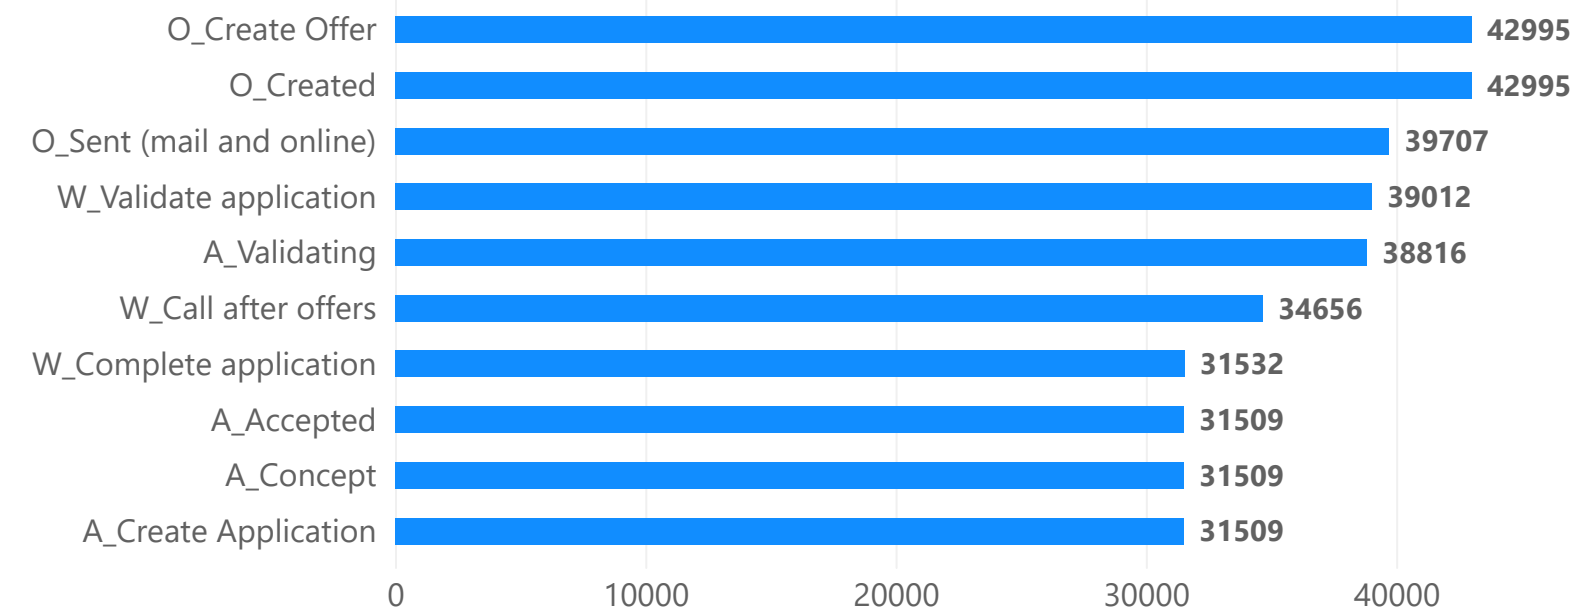

Visualized up to 60 days for readability; full dataset was used for statistical analysis

### Top 10 Process Variants

3,392 unique variants | Top 10 coverage: 45.74%

### Top 10 Business Activities

### Bottleneck Heat Table

Average elapsed time between frequent business transitions (days)

| Transition                                        | Avg Elapsed Time (Days) |
|---------------------------------------------------|-------------------------|
| A_Complete → W_Validate application               | 8.69                    |
| O_Sent (mail and online) → W_Validate application | 7.57                    |
| A_Complete → O_Create Offer                       | 6.91                    |
| O_Sent (mail and online) → O_Create Offer         | 6.64                    |
| W_Call after offers → W_Validate application      | 6.12                    |
| A_Incomplete → O_Accepted                         | 5.88                    |
| O_Sent (online only) → W_Validate application     | 4.01                    |
| A_Complete → W_Call after offers                  | 3.85                    |
| A_Incomplete → W_Validate application             | 2.50                    |
| O_Returned → O_Accepted                           | 2.04                    |
